Portfolio Report

JANUARY 2010

PORTFOLIO MANAGEMENT

MANAGER'S COMMENTS

2010 started on a positive note for the BG Portfolio, with a return of 3.72% in January. Total portfolio value now amounts to SEK 633,251. The performance is largely attributable to our overweight in Health Care, which continued it's upwards trend while the OMXS30 closed at a modest gain of 0.21%. Other gainers in the portfolio were H&M and Axis; the former due to a stronger than expected Q4 and the latter due to an announcement stating that estimated Q4 profits would be well above analysts' estimations. Meanwhile, Vestas continued to underperform following uncertainties regarding the North American operations.

Changes in the portfolio during the month included an initial position in IT consultants Know IT and profit taking in AstraZeneca ahead of the report.

The Euro, troubled by speculations about the Greek budget deficit, continued to weaken against the Swedish Krona. This had a negative effect on our holdings in Vestas, Novo Nordisk and the commodity fund.

Johan Edvardsson
Head of Portfolio Management

BENCHMARKS

OMX Stockholm 30 (OMXS30)

(Benchmark until spring 2008)

OMX Stockholm 30 is OMX Nordic Exchange Stockholm's leading share index. The index consists of the 30 most actively traded stocks on the OMX Nordic Exchange Stockholm. The limited number of constituents guarantees that all the underlying shares of the index have excellent liquidity, which results in an index that is highly suitable as underlying for derivatives products. In addition OMXS30 is also used for structured products, e.g. warrants, index bonds, exchange traded funds such as XACT OMX™ and other non-standardized derivatives products. The composition of the OMXS30 index is revised twice a year. The OMXS30 Index is a market weighted price index. The base date for the OMX Stockholm 30 Index is September 30, 1986, with a base value of 125.

Barclay Hedge Fund Index

(Benchmark from spring 2008)

The Barclay Hedge Fund Index is a measure of the average return of all hedge funds (excepting Funds of Funds) in the Barclay database. The index is simply the arithmetic average of the net returns of all the funds that have reported that month. The Barclay Hedge Fund Index is recalculated and updated real-time as soon as the monthly returns for the underlying funds are recorded. The number of funds that are currently included in the calculations for the most recent months can be found in the footnotes. Please note that the calculation for the number of funds is time-stamped and that the number of funds will continue to increase until all funds categorized within the sector have reported monthly returns.
